TECHNICAL SPECIFICATION

LNB's work frequency:	10,7-12,75 GHz
-----------------------	----------------

Dish dimension (work):	- long axis 600 mm - short axis (D) 531 mm
------------------------	---

Dish dimension (external):	630 x 562 mm
----------------------------	--------------

Offset angle:	27,77°
---------------	--------

Focal (f):	261 mm
------------	--------

f/D ratio:	0,49
------------	------

Gain at 10,70 GHz:	-
--------------------	---

Gain at 11,70 GHz:	34,10 dB
--------------------	----------

Gain at 12,75 GHz:	35,3 dB
--------------------	---------

Azimuth angle:	0-180°
----------------	--------

Elevation angle:	0-60°
------------------	-------

Mast clamp for:	32-60 mm
-----------------	----------

Feed bracket diameter:	40 mm
------------------------	-------

Reflector steel thickness:	0,5 mm
----------------------------	--------

Operational wind speed:	142 km/h
-------------------------	----------

Maximum wind speed:	191 km/h
---------------------	----------

Gross weight:	2,175 kg
---------------	----------

Qty per pallet:	200 pcs
-----------------	---------
